Introduction and Overview

Dr. Jonathan L. Kramer, Esq. is a senior broadband telecommunication engineer by training with over 45 years of telecom technology experience.

First licensed by the FCC in 1971, Kramer now holds seven FCC licenses/certifications.

Upon graduating college, Kramer was hired by Motorola to join an elite team of major system project engineers responsible for implementing modern data, voice, cable, fiber, wireless, and microwave communication systems for public safety users and corporate users.

In the late 1970s, Kramer entered the cable communication industry as a System Engineer in a single system, later working his way up to the Regional Technical Manager position overseeing the technical construction and operations of thousands of miles of cable, data, and voice/telephony outside plant in dozens of California cities and counties serving hundreds of thousands of subscribers.

In 1982, Kramer was licensed by the California Contractors State License Board as a C61-05 (now C7) low voltage communications contractor, thus being fully licensed to construct and operate fiber, cable, microwave, and other communications systems in California.

Kramer's expertise in outside plant construction under CPUC GO95 and GO128, as well as with the CEC, the NEC, and the NESC allowed him, in 1984, to begin 30 years of service to hundreds of communities in California and 30 other states (as well as the Army, Marine Corp, and Navy) as a government outside telecom plant inspector. Kramer and his staff have inspected well over 100,000 miles of outside communications plant within the U.S.

Kramer's communications technology and operations background opened the door to being a testifying expert witness in dozens of matters within and outside of California, including as an expert for the U.S. Department of Justice representing the Federal Communications Commission in the landmark cable of Playboy v. U.S.

The Playboy case triggered Kramer to enroll in law school, where he graduated with a J.D. degree (he graduated cum laude). Kramer was admitted to the California Bar in 2006. In 2012, Kramer completed his Master of Law (LL.M) degree (with distinction) in Internet and Telecommunications law from Strathclyde University in Glasgow, Scotland.

In 2013, Kramer took and passed the New Mexico Bar Exam, and he joined that Bar. A year later, Kramer was admitted to Northeastern University's Doctor of Law and Policy program, where he graduated in 2016 with his LP.D doctorate degree. Later, he later taught Masters and Doctor level students at Northeastern University.

Dr. Kramer earned his California Department of Real Estate Broker License in 2021, and his FAA UAV Pilot Certificate in 2023.

Dr. Kramer's background uniquely combines a tremendous educational and hands-on operational telecom background with an equally important legal and policy grounding.
